Createspace Independent Publishing Platform, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Many Christians have a false outlook on the world of science and philosophy. This has been causing a growing trend in the Christian community. This trend is the loss of the faith of our youth as they enter the world. Public academia is claiming our children as the world fights against the Christian world view. In this short challenge to Christians I focus on why we are disappearing from the world of science and philosophy. I explain how this is causing our own children to lose their own faith as they enter into the world of academia and face the atheist movement. I explain how we can turn the tide with a challenge to all Christians to pick up the tools we have to reclaim the authority we are losing. This book is intended to show you the importance of science and philosophy and why we need more Christian authorities in these fields as well as to motivate and encourage you to become an authority for truth wherever you are in life. Science and philosophy is not some big monster that should be devouring our world view. It is a tool we can use to find, understand and show the truth of our world view to all. Most importantly it s a tool we need to empower our children with as they become young Christian adults to they can become authorities of the truth themselves.
