SEXUAL DIMORPHISM & HABITAT OF THE SCORPION URODACUS ELONGATUS

LAP Lambert Academic Publishing Mrz 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - Part one of this study of the Flinders Ranges scorpion *Urodacus elongatus* (Scorpionidae) described instar number, sexual dimorphism, and sex related movement and survivorship. Six instars were determined for both sexes, with individuals allocated based on morphometrics. Persistent sexual differences enabled differentiation in second to sixth instars. Sexual dimorphism slowly developed in immature instars, and...
