To download **Proceedings of the Electrical Section of the Franklin Institute Volume 1-3** eBook, make sure you access the web link under and save the document or gain access to other information which might be relevant to PROCEEDINGS OF THE ELECTRICAL SECTION OF THE FRANKLIN INSTITUTE VOLUME 1-3 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: .V, and there is no distinction to be made for insulation and energy.  $E_2 = 2 C V$  (4)  $H_2 = 2 C R$ , (5) The alternating and three-phase are of same practical voltage when  $V = 2 V$  (6) Substituting (1) in (6) gives  $2 V = 173 K$  (7) or  $K = 1154 v$  For comparing the cases where the same energy is to be transmitted with the same efficiency, we have to equalize (2) and (4); and this, with (7), gives  $C = i73C$ , (8) In the line, the currents are 173 times as large in alternating than in three-phase. Equalizing (3) and (5) gives, with (8),  $R_3 = 2 R$  This means that the cross section of alternating line conductor is twice that of three-phase conductor, and that the total amounts of copper are as 4 for alternating to 3 for three-phase. This result, in combination with the erroneous assumption that the alternating system is as advantageous as the continuous, has led to the wrong conclusion that the threephase is more advantageous (for equal voltage) than the continuous transmission. If we compare the cases in which the current density is the same for both, then  $R_3 C_1 = R_1 C_3$  and substituting (8) in this  $R_3 = i73R_2$  (9) which, with (3) and (5), gives  $= 0.866$  The percentages of loss are as 0.866 in the threephase to 1 in alternating when the drop of potential along the line is the same. (9) shows that then the amounts of copper are also...
