Creative Teaching Press, United States, 2012. Paperback. Book Condition: New. 224 x 165 mm. Language: English . Brand New Book. Multiplication and division are relatively new operations for third graders. Children need many experiences grouping and separating objects to understand the meaning of these two operations. They also need to see and use number facts (such as 3 5 and 12 4) in a variety of contexts, such as in describing sets of objects or pictures, or solving word problems, in order to achieve mastery. Research has shown that repetition is essential for the brain to learn and recall information. This book provides repeated practice with fun, motivating activities that will help your child develop the skills and confidence that lead to success! Upon your child's completion of each activity, use the provided incentive chart and stickers to track progress and celebrate your child's success. Whether students need extra practice with grade-level skills or a head start on next year, Stick Kids Workbooks offer engaging activities, games, and puzzles that help make learning lots of fun. Each 56-page book features full-color activities, a list of the skills, and an explanation of why those skills are important for development. Also included are helpful tips, an answer key, a handy tracking sheet, stickers for acknowledging achievements, and appearances by the lovable Stick Kids! These right-sized (7 x 9) skill practice workbooks are perfect for use at school, or as entertaining activities on the go. Tuck them into a backpack, purse, or travel bag. Great for school breaks, vacations, and year-long practice.
