

Handbook of Zoology; With Examples from Canadian Species, Recent and Fossil

By John William Dawson

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1886 Excerpt: . substances, and in those that are carnivorous, to abrade holes in the shells of other mollusks. The embryo, in some cases, especially in the terrestrial species, is precisely like the adult; but in most of the marine species it is a free-swimming larva, with two large ciliated lobes (the velum), by which it swims and which disappear when the abdominal foot becomes developed. Some of the Gastropods are dioecious, others are hermaphrodite. Fig. 174 shows the arrangement of the Fig. 174.--Animal Of Paludina, after Woodward. a--Mouth. b-- Tentacles and Eyes. e--Foot, d--Gills. e--Intestine. f--Ovary. principal organs in a fresh-water snail of the genus Paludina. The shell of the Gastropods is constructed of the same materials with that of the last class, and is deposited by the mantle. It is never bivalve, but is often provided with a horny or calcareous operculum or lid developed from the...
