

Proceedings of the Gsa 3D Imaging Workshop, February 28, 2011 (Nist TN 1699)

By Nist

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.The General Services Administration (GSA) has been involved in 3D imaging since the early 2000s. Since 3D imaging was a relatively new technology at that time, GSA needed to develop and provide initial guidance to their project managers (PMs) on 3D imaging technology and on how to develop the scope and specifications (scope of work or SOW) for 3D imaging projects. In the mid to late 2000s, GSA developed initial guidance, in the form of a template for the SOW, based on the following criteria: ease of use for GSA project managers and the need to accommodate widely varying project types and project requirements. This report presents a summary of the workshop discussions. A list of the workshop participants is given in Appendix A. The agenda is given in Appendix B. A list of the questions that was sent out to the workshop participants prior to the workshop is given in Appendix C. Comments on the GSA's SOW for 3D-4D-BIM services received from the contractors are reproduced in Appendix D.

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.
-- Prof. Arlie Bogan

It in a single of the best book. This is for those who statte there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
-- Dr. Barney Robel Jr.
