RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Original publisher: Washington, D. C. : U. S. General Accounting Office, 2001 OCLC Number: (OCoLC)55048638 Excerpt: . . . such as examining business processes for reengineering or defining operational requirements to be supported by physical resources and systems. The defines the systems and their systems architecture view interconnections supporting the organizational or functional mission in context with the operational view, including how multiple systems link and interoperate, and may describe the internal construction and operations of particular systems. According to DOD, this view has many uses, such as helping managers to evaluate interoperability improvement and to make investment decisions concerning cost-effective ways to satisfy operational requirements. The defines a minimum set of standards and technical architecture view rules governing the arrangement, interaction, and interdependence of system applications and infrastructure. It provides the technical standards, criteria, and reference models upon which engineering specifications are based, common building blocks are established, and applications are developed. Within the three architectural views, the C4ISR Architecture Framework identifies 26 graphical, textual, and tabular architectural artifacts or products. Of the 26, DOD specifies that 7 are essential and must be developed for each enterprise architecture. Table 1 briefly describes the content of each essential product. Page 13 GAO-01-525 DOD Financial Management Enterprise Architecture This item ships from La Vergne, TN. Paperback.
